

- ▶ Cut Humidity pad to proper size, and then fix on the view window with 2 pins included.

⚠ Evaporating ability is different from pad size.

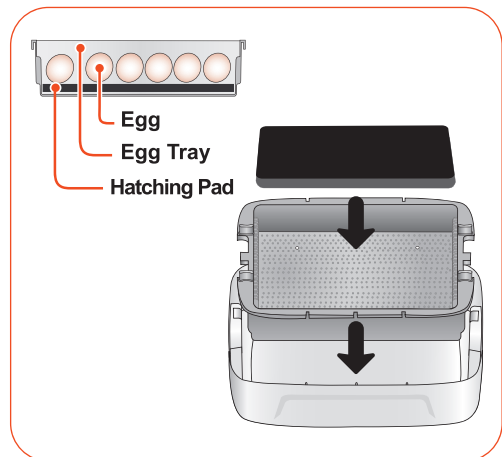

※ You can use Humidity pad for about 4 ~6 months, but it can be different depending on water quality.

※ Humidity pad can be purchased separately.

- ▶ Assemble bottom body, Tray, and Tray hatching pad.

⚠ Ensure hatching pad is placed in egg tray.

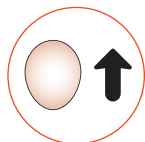

※ After hatching finished, be sure to wash and dry tray mat completely for next use.

- ▶ Place eggs by adjusting tray divider according to egg size.

⚠ Control the space of eggs and divider optimally so the eggs are not interrupted for incubation.

Tip The egg to incubate must be a fertilized egg.
(Refer to the Rcom common sense app.)

Tip It is recommended to place eggs with sharp end down.
